COMPANY PROFILE

ABOUT WEBO

WEBO SOFTWARE SOLUTIONS

A Key To Software Complications

“Webo Software Solutions” is a software and technological oriented company with office in United States of America. Having started a decade ago with a simple vision of e-mail marketing, Webo has expanded its dimensions in the fields of technical support along with software and App development. Over the years Webo Solutions has successfully turned to a trusted and renowned leader in providing software development services, system integration and solution delivery services.

We are focused on building long term collaboration with our customers by meeting their expectations with our high quality work, fast delivery dispatch and providing them dependable, efficient, flexible and cost-effective solutions. With the expertise of our highest quality development talents and projects managers, Webo has developed a strong and solid standing for surpassing our customers’ expectations. We intend to be in front of the needs of our customers and deeply understanding their business resulting in delivery and optimization of IT solutions from initial stages up to final delivery, maintenance, and constant upgrading. We not only look at the matter from the customer’s perspective, but also from customer’s customer perspective to get recognition of their actual business requirements for the solutions we have been hired to provide them.

Furthermore, we provide practical Service Level Agreements (SLA) including most of the added maintenance services. With our 24/7/365 days support, we are making troubleshooting extremely easier.

Webo has highly skilled team of Project Managers, consultants and Developers who have proved their skills on large scale projects. We provide custom development solutions across Software Expansion, Mobile Phone Application Development, Responsive Web Design and Web App Development Services, Dedicated VPS, Email marketing services, E-Commerce, CRM, Shopping cart software, Internet marketing and website hosting, for enhanced online presence and corporate e-identity. We strive to help our clients realize their software application and development goals.

With over 10 years of experience in providing IT staffing solutions, we facilitate you to achieve your business objectives and gain supreme advantage in your market. Having started the business as an e-mail marketing company, Webo has grown into an international leader in software engineering and development with a team of experts focused on bringing value to our customers and helping them succeed in the market. You can be certain and confident that we understand the best suited options for your business.

Our team has the competence to leverage its knowledge and expertise in this sector at very competitive pricing and thereby delivering quality software solutions. You can count on transparent pricing, superior communication, and unparalleled quality. We have always understood our customers' needs yielding their trust that we will select the best technology to boost their business. The outcomes of our projects have always met the requirements of our customers and have satisfied them. Our increasing list of contented customers' not only act as our exceptional and outstanding references but are also a source of our flourishing business.

General Translation:

This category includes the documents which do not require any translator with special knowledge. The basic requirement is language proficiency. These documents include business letters, job applications, news articles or travelogues. We deal this area with great care and hire the services of most suitable persons having complete knowledge of language and prior translation experience or who have a special preference for specific assignments

Legal Translation:

Legal translation covers a wide range of documents including legal, administrative, corporate and technical documents containing many specific terms and expressions only understandable by a legal expert. Legal translation such as general terms and of a contract or notarial deed must be error free as one mistake can lead to serious consequences for the parties involved. Legal validity of the documents is also very important.

This complicated process can be made easy by professional translators at Web Software Solutions. We ensure you that the legal translator hired by you is certified, accredited and/or qualified. Every translation is rechecked by a reviser who also has legal expertise.

Technical Translation:

This category includes translation of technical documents related to engineering, IT, electronics, mechanics and industry. Web Software Solution provides technical translation services with the help of technical translators having previous experience in technical environment or had a technical education. For every technical field, we have hired persons having specific relevant knowledge. We can provide translations of all fields from ship building to IT, from chemicals to construction. The technical documents translated by our experts include instructions and manuals, safety regulations, environmental impact assessment, installation instructions, and product specifications.

Medical Translation:

Web Software Solutions specializes in medical translations in the field of human as well as veterinary medicine. Our team of medical translators include doctors, pharmacologists and medical researchers helping us translate SPCs, ICFs, study protocols and package leaflets. But also technical medical texts such as manuals for medical equipment, software manuals and software applications. We also translate marketing and product texts such as catalogues, brochures, websites and patient diaries.

Academic & Research Writing:

We provide 100% original, plagiarism free research papers, dissertation, thesis and assignments. All work will be done by professional writers with PhD or Master's degree having expertise in writing and knowledge of the relevant field. Web Software Solutions can help you in your research and academic writing at every stage of your writing by allowing you to get involved in the process.

Article/Blog:

Web Software Solutions has a team of professional writers to provide the companies and individuals with excellent blog and article writing services. Our professional blog writers build the blogs on SEO keywords to attract a larger audience on the internet with such a small piece of writing. The article writers are equipped with vast knowledge and have grasp on language to write a long piece in a journalistic style making it an error free writing fit for peer review or editing.

Copywriting:

The creative activity of copy writing focuses on the task of writing the text of advertisements or publicity material with the aim of increasing brand awareness persuading individuals/groups to take particular desired actions. Web Software Solutions has a team of expert copywriters adhering to the very highest editorial standards always supplying you with high-quality outcome whenever you avail our professional copywriting services.
